

Rakesh Telang

Python Developer – AI & Generative AI

+91 9075805070 – work.rakesh2971@gmail.com – LinkedIn – GitHub

Kolhapur, Maharashtra 416003 – Open to relocation

Professional Summary

Python Developer and B.Tech Computer Science (AI/ML) graduate with experience across three internships and hands-on projects in API integration, Retrieval-Augmented Generation (RAG), multi-agent systems, machine learning, and computer vision. Proficient in Python, Flask, Pandas, NumPy, ChromaDB, and Hugging Face Transformers. Interested in building reliable Python applications enhanced by practical AI capabilities.

Technical Skills

Programming Languages: Python, SQL

AI & Machine Learning: Hugging Face Transformers, RAG, Pandas, NumPy, OpenCV

AI Tools & Platforms: OpenAI GPT-4o, Notebook LLM, Claude Code, ChromaDB, n8n, Prompt Engineering

Developer Tools: Flask, PostgreSQL, Git, API Integration

Experience

Liha Tech

Kolhapur, Maharashtra

Data Science Intern

Feb 2026 – Present

- Built AI-driven CRM automation integrating the Meta WhatsApp Business API for marketing and campaign-management workflows, supporting outreach to 1000 contacts.
- Designed and deployed a RAG chatbot grounded in company knowledge sources, achieving sub-2-second response times and improved contextual accuracy.

IBM SkillBuild – AICTE (All India Council for Technical Education)

Remote, India

Artificial Intelligence & Generative AI Intern

Jan 2026 – Feb 2026

- Applied prompt engineering across Generative AI coursework exercises to improve LLM output quality.
- Designed a mental-health support chatbot using user-focused conversational flows and conversational AI best practices.

Microsoft – AICTE

Remote, India

Artificial Intelligence Intern

Apr 2025 – May 2025

- Prepared 3 Kaggle datasets and fine-tuned Hugging Face Transformer models for sentiment analysis in Google Colab.
- Completed the full machine-learning lifecycle from data preparation and model evaluation through deployment.

Projects

Ashta Pradhan AI – Python, LangGraph, Gemini, ChromaDB, RAG

- Orchestrated an eight-agent system with LangGraph and Gemini 1.5 to produce structured responses through adversarial debate.
- Implemented ChromaDB-based RAG over *Adnyapatra*, reducing hallucinations by approximately 40%.
- Achieved sub-5-second response time by parallelizing agents with Gemini 1.5 Flash.

TWIN AI – n8n, WhatsApp API, OpenAI GPT-4o, PostgreSQL, pgvector, RAG

- Engineered n8n workflows for personalized, scheduled WhatsApp broadcasts with CSV uploads, rate limits, retries, and delivery tracking.
- Built a bilingual RAG assistant using GPT-4o, PostgreSQL, and pgvector to answer English and Hindi product queries and exclude expired offers.
- Secured real-time webhooks with instant opt-outs, spam rate limits, and input sanitization against prompt injection.
- Unified workflow state and analytics in PostgreSQL, automated service alerts, and achieved sub-3-second end-to-end responses.

Education

Bharati Vidyapeeth's College of Engineering, Kolhapur, Maharashtra

B.Tech in Computer Science (AI-ML), CGPA: 7.7/10

Graduated: July 2026

Certifications & Leadership

- Microsoft AICTE Artificial Intelligence Internship; IBM SkillBuild Generative AI Internship
- Student Head, Techno Bharati 2024; Vice Head, Artificial Creativity Club
