

Rakesh Telang

Python Developer | Machine Learning Engineer

+91 9075805070 · work.rakesh2971@gmail.com · [LinkedIn](#) · [GitHub](#)

EDUCATION

Bharati Vidyapeeth's College of Engineering

B.Tech in Computer Science (AI-ML)

– CGPA: 8.0/10

– Relevant Coursework: Machine Learning, Data Structures (Python), Neural Networks, DBMS.

Kolhapur, Maharashtra

Nov 2022 – Present

TECHNICAL SKILLS

Core Languages: Python, SQL, Java, JavaScript

AI/ML Libraries: TensorFlow, Pandas, NumPy, OpenCV, Hugging Face Transformers, LangChain

Web & Tools: Flask, Google Colab, Kaggle, Git/GitHub, VS Code

Soft Skills: Problem Solving, Leadership, Team Collaboration

EXPERIENCE

Lihatech

Data Science Intern

Onnsite

Feb 2026 – Present

- Helping develop a CRM system for automated marketing and campaign management, integrating AI models and Meta WhatsApp Business API.
- Building AI-powered chatbots for customer support using Retrieval-Augmented Generation (RAG) to deliver accurate and context-aware responses.

IBM SkillBuild - AICTE

Artificial Intelligence & Generative AI Intern

Remote

Jan 2026 – Feb 2026

- Focusing on Generative AI and Deep Learning fundamentals via industry-aligned coursework.
- Mastering Prompt Engineering techniques for optimizing Large Language Model (LLM) performance.
- Currently working on chatbot for mental health support under the guidance of mentors.

Microsoft - AICTE

Artificial Intelligence Intern

Remote

Apr 2025 – May 2025

- Completed an intensive internship focused on AI foundations and cloud-based workflows.
- Built a Sentiment Analysis Model using Python and Hugging Face Transformers to classify customer feedback.
- Utilized Google Colab for model training and Kaggle datasets for evaluation and testing.
- Gained hands-on experience in fine-tuning pre-trained models and deploying them for inference.

PROJECTS

Ashta Pradhan AI | *Python, LangGraph, Google Gemini, RAG*

- Orchestrated a Multi-Agent System using LangGraph and Gemini 1.5, simulating an 8-minister council to resolve queries via adversarial debate loops.
- Implemented RAG with ChromaDB to ground agents in historical texts (Adnyapatra), reducing hallucinations by ~40% and ensuring ethical alignment.
- Engineered a Directed Cyclic Graph where agents recursively critique peer outputs (e.g., Finance vs. Law) prior to final synthesis.
- Achieved sub-15s latency for full council debates by parallelizing agents using Gemini 1.5 Flash's high-throughput API.

TrafficPulse AI (Road Safety System) | *Python, OpenCV, YOLO, React.js*

- Hackathon Qualifier: Selected for college Hackathon finals for innovative road safety solution.
- Developed an AI system to detect traffic violations with 86% accuracy.
- Integrated a React.js frontend to visualize live traffic feeds and generate real-time alerts.

LEADERSHIP & EXTRACURRICULARS

Student Head, Techno Bharati 2024: Led a 20+ member team to organize a national technical event.

Vice Head, Artificial Creativity Club: Organized AI/ML workshops and guest lectures.

State Level Athlete: Represented college Volleyball team at state level.
